

⭐ Advanced Projects — Coming Soon!

Hello Innovator 🛠️🌟

The **Advanced Projects** are the next big leap in your journey! These will combine multiple components, sensors, and logic to create **real-world applications** — perfect for those ready to go beyond the basics.

But first, we'll be releasing the **Intermediate Projects** (31st Dec 2025) so you can build a strong foundation.

Once those are out, the Advanced Projects will begin rolling out! 🚀

📅 Planned Timeline:

- **Starting Feb 2026** → First Advanced Projects.
- More projects will be added step by step after that.

⭐ Bonus for You:

Every new project will be **free for our existing users**.

Simply use the **same link** you used to download this content, and you'll always have the latest version.

Thanks for being part of our learning community ❤️
